### CLIQ FEATURES

- | Change electronic access for CLIQ keys
- | Audit trail – keys
- | Audit trail – cylinders
- | Set temporary electronic access for a key
- | Create simple time schedule for restricted access

**ASSA Performer is a computer software package developed to help any person involved in management of keys and cylinders in a building.**

Key management is crucial in order to maintain the level of security that your system was initially designed for over time. If a key is lost or stolen, this can immediately jeopardise the security of the building and any assets, not to say the potential threat also to individuals.

There are four vital questions that you have to be in control over at all times:

- What keys have been handed out?
- To whom have they been handed out?
- Which doors can a key holder access?
- When are the keys due to be handed in?

Manual key handling is time-consuming and increases the risk of errors. ASSA Performer includes a vast number of features that will improve your efficiency and management of keys, which will improve the level of control in your building.

# ASSA CLIQ®

ASSA Performer also manages keys and cylinders with the ASSA CLIQ® functionality.

With ASSA Performer you can give CLIQ® keys access to CLIQ® cylinders, which significantly increases the flexibility in your lock system. You may also remove key access at any time, which helps you maintain security in your lock system if, for example, a key is lost or stolen.

## Functions

The lock chart in ASSA Performer shows the system structure in graphic form. This is identical in appearance to that used by the end user, the locksmith and ASSA ABLOY. Having the same information makes communication much easier.

ASSA Performer can give you full audit trails for all your CLIQ cylinders and keys, keeping a history of events logged for your system and allowing you to look back, search and print a variety of reports.

With ASSA Performer you can create a simple time schedule, grant access to individuals on specific dates and times only, and register timed eve

ASSA Performer can be connected to Microsoft Outlook® or Microsoft Exchange®. Connecting the ASSA Performer to Outlook®, for instance, makes it easy to maintain one simple list of contacts.

It also makes it possible to place reminders from ASSA Performer in the Outlook® calendar.

ASSA Performer works on a single Windows® computer or on a network, and can handle virtually unlimited numbers of people, keys, cylinders and lock systems.

### System Requirements

Processor	Pentium 1.8GHz
RAM	256MB
Hard Disk	200MB at installation
CD	12X speed
Operating System	Windows® 2000, XP, 2003 Server
Internet Browser	Microsoft Internet Explorer® 5.0 or later (for reports)

### PRACTICAL ADVICE FOR KEY SECURITY

- Inform the key holders of their responsibility.
- Inform the key holder about the value that the key represents.
- Never hand out a key without getting a signed receipt.
- Conduct key revisions on a regular basis.
